## 1.1 menusys package

### 1.1.1 Submodules

### 1.1.2 menusys.menusys module

# Updated By: Benjamin P. Trachtenberg # # Date Written 1/11/2015 # # # # Description: # # Menu system tools # #  
# #####

`menusys.menusys.chunk_up_string(string_to_chunk, size_of_chunk=100)`

Function to chunk up a string, and make a list of chunks

**Parameters**

- **string\_to\_chunk** (*String*) – The string you want to chunk up
- **size\_of\_chunk** (*Integer*) – The size of the chunks in characters

**Return type** List

**Returns** A list containing the chunks.

`menusys.menusys.clear_screen()`

Function to do a clear screen in Linux or Windows

**Return type** None

**Returns** None it clears the screen

`menusys.menusys.make_menu_dict_from_dict(orig_dict, dict_key_for_display)`

Function to create a menu dictionary with sub dictionary

**Parameters**

- **orig\_dict** (*Dict*) – Dictionary you want to make a menu from
- **dict\_key\_for\_display** (*String*) – Dictionary item to become the menu

**Return type** Dict

**Returns** A dictionary with menu and dictionary in line

`menusys.menusys.make_menu_dict_from_list(orig_list)`

Function to create a menu dictionary from a list

**Parameters** `orig_list (List)` – List you want to make a menu from

**Return type** Dict

**Returns** A dictionary with menu

`menusys.menusys.menu(menu_dictionary, menu_header, back_function=None, no_quit=None, allow_sys_exit=None)`

Function to create a menu from a dictionary with a back option

**Parameters**

- **menu\_dictionary** (*Dict*) – Dictionary in the following format {1: {'MENU': 'Yes'}, 2: {'MENU': 'No'}}
- **menu\_header** (*String*) – The header of the menu
- **back\_function** (*Function*) – The callback Function
- **no\_quit** (*Boolean*) – Set to True if you do not want a quit option
- **allow\_sys\_exit** (*Boolean*) – Set to true if you want the menu to quit the app, default returns q

**Return type** String

**Returns** The selected option

`menusys.menusys.menu_multi_select(menu_dictionary, menu_header, back_function=None, no_quit=None, allow_sys_exit=None)`

Function to create a menu from a dictionary with a back option

**Parameters**

- **menu\_dictionary** (*Dict*) – Dictionary in the following format {1: {'MENU': 'Yes'}, 2: {'MENU': 'No'}}
- **menu\_header** (*String*) – The header of the menu
- **back\_function** (*Function*) – The callback Function
- **no\_quit** (*Boolean*) – Set to True if you do not want a quit option
- **allow\_sys\_exit** (*Boolean*) – Set to true if you want the menu to quit the app, default returns q

**Return type** List

**Returns** The selected options in a list

`menusys.menusys.word_wrap_string(string_to_wrap)`

Function to word wrap a string depending on the console

**Parameters** `string_to_wrap (String)` – The string you want to wrap

**Return type** String

**Returns** A word wrapped string

`menusys.menusys.word_wrap_string_and_print(string_to_wrap)`

Function to word wrap a string depending on the console and print it

**Parameters** `string_to_wrap` (*String*) – The string you want to wrap

**Return type** None

**Returns** None but it does call the print function

### 1.1.3 Module contents

Init for menusys

## CHAPTER 2

---

### Indices and tables

---

- `genindex`
- `modindex`
- `search`

**m**

`menusys`, [3](#)

`menusys.menusys`, [1](#)

## C

`chunk_up_string()` (in module *menusys.menusys*),  
1  
`clear_screen()` (in module *menusys.menusys*), 1

## M

`make_menu_dict_from_dict()` (in module  
*menusys.menusys*), 1  
`make_menu_dict_from_list()` (in module  
*menusys.menusys*), 2  
`menu()` (in module *menusys.menusys*), 2  
`menu_multi_select()` (in module  
*menusys.menusys*), 2  
`menusys` (module), 3  
`menusys.menusys` (module), 1

## W

`word_wrap_string()` (in module  
*menusys.menusys*), 2  
`word_wrap_string_and_print()` (in module  
*menusys.menusys*), 2
